

Q TOWER

Q Tower is the new electronic column specifically created for the hospitality world.

ELEGANCE AND FINE FINISHES IN A SINGLE SOLUTION

The column body is made entirely of stainless steel for maximum sturdiness. The front panel with LCD display and backlit steel keys give it maximum elegance.

NOVA D.A.

We are an innovative company that pays attention to sustainability. We are addressing those who consider water a precious resource, which should not be wasted but valorised

Q TOWER

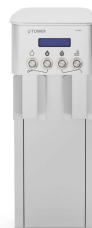

Microfiltered water

- Ambient
- Cold
- Cold sparkling

Thanks to the "dose control" function, it is possible to set and adjust the quantity of water to be dispensed to your liking to quickly and automatically fill the bottles. You can set up to two desired doses.

MODELL

Inox Skinplate

QTOW2000

INSTALLATION

Q Tower is easy to install and inspect thanks to the front panel which allows direct access to the operator without dismantling the column.

EROGATION

It features two dispensing spouts and the dispensing area is tall enough for any bottle and carafe.
